

ONLY USE 30mm SQUARE TWIST NAILS IN SMALL ROUND HOLES

DO NOT USE WOOD SCREWS IN ANY METALWORK ITEMS SUPPLIED BY ETS TRUSSES.

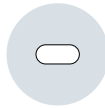

30mm Square twist nail, available at all merchants.

Round Holes Purpose:

To fasten a connector.

Fill Requirements: Always fill, unless noted otherwise.

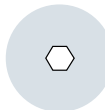

Obround Holes Purpose: To make fastening a connector in a tight location easier.

Fill Requirements: Always fill.

There are a few metalwork items that have special fixings which ETS supply. These are IUB, HGUS & HGUQ shoes which have different fixings holes.

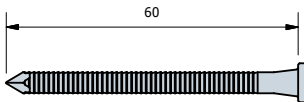

- IUB require SDS screws (Hex Head style, 6.2mm shaft thickness, 64mm long)
- HGUQ require SDS screws (Hex Head style 6.2mm shaft, 85mm long)

Hexagonal Holes Purpose:

To fasten using structural wood screws.

Fill Requirements: Used with SDS structural screw.

- HGUS require Ring Shank nails (4mm shaft, 60mm long)

NEVER USE ANY OTHER TYPE OF FIXINGS, ESPECIALLY WOOD SCREWS, AS THEIR SHEAR STRENGTH IS NEARLY HALF OF 3.75 x 30mm NAILS.
